Summary

Driven **Junior DevOps Engineer** with a strong passion for **Linux Server Administration, automation**, and building scalable infrastructure. Proven expertise in configuring networking components and writing robust **Python scripts**. Adept at collaborating with **cross-functional teams**, supporting fast **client deployments**, and managing **CI/CD** pipelines to efficiently resolve complex production operational issues.

Skills

DevOps & Automation: CI/CD Pipeline Management, Docker, Linux, Ansible, DevOps Best Practices

Programming & Scripts: Python, Shell Scripting, Bash, SQL, Git, OOP, Data Structures, JSON

Networking & Web: DNS, HTTP/HTTPS, SSL, Firewalls, Routing, Nginx, System Architecture

Databases & Cloud: PostgreSQL, MySQL, AWS, DigitalOcean, Cloudflare, Troubleshooting

Experience

Cloud / DevOps Intern | **Teleglobal International** – Pune Jan 2026 – Apr 2026

- Enhanced scalable **backend services** by deploying containerized **Python** code and **Linux shell scripts** on AWS EKS, utilizing Docker orchestration to ensure highly reliable system performances and fully secure global apps.
- Resolved **production issues** by troubleshooting bugs, decreasing overall vital enterprise systems downtime **65%**.
- Managed secured **CI/CD** pipeline workflows using **GitHub** Actions to strictly enforce core **DevOps** best practices.
- Monitored **platform health** using Prometheus to quickly resolve operational issues and optimize core workflows.

DevOps Intern | **Enacton Technologies** – Surat Sep 2025 – Jan 2026

- Automated scalable cloud infrastructure provisioning on **DigitalOcean** by developing Ansible playbooks, reducing manual troubleshooting efforts and administrative overhead by exactly **80%**, greatly boosting core IT output.
- Configured core **networking** components including **Nginx**, DNS records, and **SSL certificates** for secure routings.
- Supported rapid **client deployments** and **SaaS** application releases across completely secure **Linux** environments.
- Wrote automation scripts using **Python** and Bash to effectively resolve complex **operational issues** immediately.

Software Development Engineer Intern | **Soluxction Space LLP** – Pune Jan 2025 – Mar 2025

- Maintained scalable **cloud infrastructure** by configuring **AWS** core services, actively supporting **system and application architecture** for global teams, which optimized critical performance and system stability immensely.
- Streamlined executions by collaborating with **cross-functional teams**, reducing all deployment failures by **30%**.
- Accelerated **Python** application deployments by seamlessly integrating Jenkins pipelines for reliable releases.
- Managed secure **Linux** server environments and **AWS S3** storage to ensure continuous high availability of system.

Projects

Network Routing Simulator

Python, NetworkX, Networking Fundamentals

- Strengthened **networking fundamentals** by building a Python routing simulator using NetworkX and Matplotlib that models Distance Vector and Link-State algorithms, enabling visual analysis of routing in complex systems.
- Simulated real-world network failures scenarios by modeling topology changes in the robust routing simulator.
- Improved understanding of network convergence by implementing both Distance Vector and Link-State algorithms.
- Analyzed routing behaviors effectively to guarantee highly secure and fault-tolerant network infrastructures.

Linux Security Audit Utility (linux-secsan)

Python, Linux, Security Automation

- Strengthened **cloud infrastructure** security by developing a Python auditing tool to identify risky Linux configurations and enforce **DevOps best practices**, ensuring continuous compliance and robust enterprise security.
- Accelerated vital troubleshooting workflows by designing automated **algorithms** for highly key scoring engines.
- Prepared structured JSON reports to seamlessly integrate vital security audits into **CI/CD** pipeline workflows.
- Developed robust **Python** scripts adhering to strict **OOP** principles to securely identify system vulnerability.

Education

Savitribai Phule Pune University — BE in Information Technology (2026)

9.25/10

Certifications & Activities

Certifications

- Introduction to Linux (LFS101x) – Linux Foundation
- AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services
- Networking Basics – Cisco Networking Academy**
- Getting Started with Artificial Intelligence – IBM SkillsBuild
- TataStrive** CyberShiksha (CEH-equivalent) – TCS Ion

Co-curricular Activities

- Technical Co-ordinator (ITSA)
- IBM SkillsBuild Top 10
- Avishkar 2024 RunnerUp
- SIH 2024 Institute Winner
- Google AI Student Ambassador
